This guidance applies to all University employees, both represented and non-represented. This guidance equally applies to all visitors on campus engaged in university related activities or business.

A. Working On-Campus

Based upon the most recent guidance from the Pennsylvania Department of Health, Bloomsburg University will not require masks on campus beginning June 28, 2021 for all individuals, vaccinated or unvaccinated, at any campus location, including indoors. However, masks continue to be highly recommended for unvaccinated individuals at indoor locations on campus and all individuals who choose to wear a mask may continue with that practice.

B. Social Distancing

a) You should practice and maintain social distancing from others during your time on campus, when possible.
b) If feasible, ask your supervisor about implementing staggered break/lunch times.
c) Your meetings and/or training sessions should be conducted virtually, whenever possible. If a meeting or training must be held in person, it should be with the fewest number of people, possible, while still maintaining the six (6) feet social distance.
d) When possible try to stagger work start and stop times within your work area so as not to be in a large group gathering when entering or leaving work.

C. COVID19 Hygiene

a) You are expected to routinely and regularly practice good COVID19 hygiene.
b) You should wash your hands often with soap and water for at least 20 seconds or apply hand sanitizer.
c) You should avoid touching your nose, mouth, and eyes.
d) When coughing or sneezing do so into your elbow and immediately wash hands or apply hand sanitizer.
e) If wearing gloves, remove them after the task is complete to avoid cross contamination and wash your hands immediately after taking them off.
f) You should frequently clean and disinfect your personal work area, including phones, computers, and other items that are frequently touched.
g) You should try to avoid sharing equipment, if it is necessary, such as using the office copier, clean/sanitize the touch points before and after you use the equipment. You should also consider washing or sanitizing your hands as well.

D. Personal Health

a) You are expected to self-monitor your personal health condition, including taking your temperature before leaving home for work.
b) Use the Husky Health Checker on a daily basis for self-monitoring prior to the start of your work day.
c) If you feel sick, or seem to have COVID type conditions, you should not come to work, and should notify your supervisor as per your normal absence notification procedure.
d) If you feel sick while at work, notify your supervisor and go home. When notifying your supervisor, you should also identify any other people with whom you may have had contact while at work.

e) If you seem to develop COVID-19 related symptoms, such as a fever (100.4 degrees Fahrenheit or higher), a cough, difficulty breathing, chills, repeated shaking with chills, acute muscle pain, acute headache, sore throat, and or new loss of taste or smell; you should notify your supervisor and contact your primary healthcare provider for medical advice.

f) If someone within your household, or someone with whom you had close, direct contact with is being tested for COVID-19, you should stay home and notify your supervisor.
