

# Department of Management

## Supply Chain Management Minor Requirements

The supply chain encompasses activities associated with the planning, sourcing, creation, and delivery of products and services. SCM is the discipline that manages the linkages between external partners and internal functions to optimize the flow of products, services, information, and money. Effective supply chain management is a potent strategic resource for organizations to deliver more value, lower costs, and more agile responses in the face of steady change.

### **Required Courses (18 Credits)**

MGMT 370 Managerial Decision Making

MGMT 371 Supply Chain Operations

MGMT 474 Managing Quality

MGMT 475 Logistics

MGMT 478 Managing Business Processes
